Manufacturer: HCB Specialty Tools

Description

* For removing ball joints, control arms and other suspension components.

* Eight adjustment points to get the maximum fitness and leverage.

* The suspension arm lever is not intended to break the taper of the suspension joint,

the joint must be separated from the suspension arm by using the appropriate tool and then

this lever can be used to facilitate removal.

* Refer to figure, the fulcrum point (end of suspension arm lever) should be adjacent to

the pivot point of the suspension arm.
