Description

Product Description
This tool kit is designed for the removal of bearing from the main shaft of the Volvo (FM12) truck. It consists of two large circular bearing caps, a central shaft with a handle, and various smaller components like pins and washers. The tool kit is made of high-quality steel and is designed to be used safely and effectively to remove the bearing from the main shaft without causing any damage to the main shaft or the bearing itself. The tool kit is also very easy to use and can be used by anyone who is familiar with basic mechanical tools. The tool kit is a must-have for anyone who works on Volvo (FM12) trucks and needs to remove the bearing from the main shaft.
