

H.C.B-A1776 FORD/ LAND ROVER DIESEL PUMP SPROCKET PULLER

* From 2011 onward, the sprocket no longer has threaded holes which means the legs of the puller to remove the sprocket must be hooked-in shape.

Description

DESCRIPTION
This tool is used to remove the sprocket from the diesel pump of the engine. It is a very useful tool for the mechanic. The tool is made of high quality steel and is very durable. It is easy to use and does not require any special skills. The tool is available in two sizes, 1/2 inch and 3/4 inch. The 1/2 inch size is suitable for most engines. The 3/4 inch size is suitable for larger engines. The tool is sold in a box with a carrying handle. The box is made of cardboard and is very sturdy. The tool is a very good value for the money. It is a must-have for any mechanic who works on diesel engines.
