Description

DESCRIPTION
This tool is used to install the bearing to the main shaft of the Volvo (FM) truck. It is a heavy-duty tool made of high-quality steel. The tool is designed to fit over the main shaft and the bearing, and it is used to apply even force to the bearing during installation. This ensures that the bearing is installed correctly and that it will last for a long time. The tool is easy to use and it is a must-have for any Volvo (FM) truck owner.
