Description

NEW

Product description: This tool is used to compress the valve springs on the Ford 4.6L, 5.4L, and 6.8L 3V engines. It is a heavy-duty tool made of chrome-plated steel. The tool has a long handle and a short handle. The short handle has a hook that fits over the valve spring retainer. The long handle has a hook that fits over the valve spring cap. The tool is used to compress the valve spring by pulling the long handle down. The tool is used to install the valve spring cap and to adjust the valve clearance.

Product features:

- Heavy-duty chrome-plated steel construction
- Long handle for easy operation
- Short handle with hook for valve spring retainer
- Long handle with hook for valve spring cap
- Adjustable valve clearance

Product specifications:

- Material: Chrome-plated steel
- Weight: 1.5 lbs
- Length: 12 inches
- Width: 2 inches
- Height: 1 inch

Product applications:

- Ford 4.6L, 5.4L, and 6.8L 3V engines
- Valve spring compression
- Valve spring cap installation
- Valve clearance adjustment
