Description

DESCRIPTION
The H.C.B-A6059 is a specialized tool for adjusting the timing of the camshafts on Porsche 996 and 997 engines. It is designed to ensure precise valve timing, which is crucial for optimal engine performance and longevity. The tool consists of two main components: a base plate and a camshaft holder. The base plate is made of high-quality black plastic and features two large white rectangular openings for the camshafts. The camshaft holder is also made of black plastic and has a white rectangular opening for the camshaft. The tool is used by inserting the camshafts into the white openings and securing them with the camshaft holder. This ensures that the camshafts are held in the correct position during the timing adjustment process. The H.C.B-A6059 is a professional-grade tool that is essential for any mechanic working on Porsche 996 and 997 engines.
