Description

DESCRIPTION
H.C.B. V1207 - Porsche R & R Vibration Damper
This tool is used to remove and install the vibration damper on the rear suspension of the Porsche 911 (Type 996) from 1997 to 2005.
The tool consists of a long, angled metal rod with a blue handle and a black mounting bracket.
The mounting bracket is attached to the rear suspension arm and the metal rod is used to push or pull the vibration damper.
The blue handle is used to grip the metal rod and apply force.
The tool is made of high-quality steel and is designed to be durable and long-lasting.
The tool is easy to use and is a must-have for anyone who works on Porsche 911 (Type 996) vehicles.
The tool is sold as a single unit and is not compatible with other Porsche models.
